

ABDELHAKIM BOUKEFFOUSSA

BUSINESS AND OPERATIONS | IT, AI & MARKETING

Hi everyone — I'm Abdelhakim. My work sits where technology meets business: IT and systems on one side, operations and marketing on the other.

MY STORY

I've spent my career on the technical side: IT support, systems, user support, infrastructure and technical team coordination. More recently I've worked on digital and e-commerce projects, where the technical and commercial sides meet.

WHAT I WANT FROM THESE 10 DAYS

- Learn how the rest of the cohort works.
- Build connections that outlast the ten days.
- Get better at telling my own story.
- Leave with practical skills and a clearer idea of what's next.

OUTSIDE WORK

Outside of work I train Brazilian Jiu-Jitsu — the part of my week with no screens in it. It's taught me more about consistency and patience than I expected.

DAY 1 — WORKSPACE SETUP

Where most of the work happens.

Looking forward to meeting you all — and to staying in touch well past Day 10.
